

St Asaph Optic Technium project St Asaph Business Park

Project: Europe's largest PV installation at the Welsh Development Agencies
St Asaph OpTic Technium Project

Europe's largest CIS PV installation was designed and installed by PV Systems at the Welsh Development Agency, St Asaph Optic project. 2400 PV panels were installed on an EETS custom-designed mounting system onto a curved, standing seam roof and facade.

PV Systems worked with Percy Thomas Architects, and Shepherd Construction on this landmark project.

The project was supported by the Welsh Assembly Government and the Welsh Development Agency.

Winner of the 'Eurosol' Award 2004
also shortlisted for the Environmental Sustainability category of the RICS 'Building Of The Year Award'
