

AXA Insurance Tunbridge Wells

AXA UK, a wholly owned subsidiary of AXA SA, operates in the UK and Ireland, and occupies leading positions in its main markets

PV Systems provided a turnkey solution to the client from feasibility study to supply and install a range of renewable technologies, solar PV systems and solar car park lighting.

The PV solar systems are installed across 6 locations of the buildings, with a total system output of 43.20kWp. The mounting systems are combination of PV Systems latest innovative LoPRO™ system specially designed for flat roofs where fixing to surfaces is not necessary, facades and high level support structures
